

# Hot New Deal for Engineers

## The GLS-1000 or the New GLS-1500 from TOPCON and PPS, INC.

- **Incredibly Accurate**
- **Incredibly Compatible with most Software**
- **Incredibly Affordable**

Have a job to do? Big or small, we can help you add this technology to better accomplish the job. Consider renting the GLS-1000 Laser Scanner complete with an Engineering Services Technician to do the job.

### A useful tool in the following applications and markets:

- **Architecture:** Measuring buildings and their facades for historical restorations or documentation.
- **Industrial Measurement:** Measuring complex mechanical operations like pipelines and the inner workings of chemical and nuclear power plants.
- **Infrastructure:** Measuring difficult to reach or complex surface structures like bridges, roadways and buildings for as-built drawings; including roadways, shipping docks, parking lots; interference checks with new designs, performing condition assessments of bridges and as-built scan data.
- **Forensics:** Documenting disaster areas, including building collapses, roadway defects and structural failures; collision areas, damaged vehicles, the remnants of building fires; recording crime scenes.
- **Land Surveying:** Comparing and inspecting work in progress with original plans; Surveying high-traffic areas without shutdowns or risk to a survey crew; Conducting remote and accurate measurements of rock faces; gathering volumetric measurements of cuts and fills.
- **Gaming graphics and Animation:** Producing accurate 3D models of movie sets for the purpose of generating digital special effects; producing 3D models for Gaming Animation.
